

Mining and the Green Revolution

This is a resource created by Ben Lepley of SRK Consulting (UK) Ltd for the Earthlearningidea Team.

In this topic there is a short PowerPoint that outlines how important mining is and will be to decarbonising our lives. It includes a series of worksheets and links to 6 video clips which explore what changes have happened in mining and will be happening to reduce the negative impacts. The video clips cover the following topics:

- Why we mine
- What we mine
- How we mine
- Where we mine
- Changes in the industry
- Careers in exploration and mining.
